## Celebrating 140 Years!

## **SCIENCE WORDS:**

1. **Eclipse** – the total or partial obscuring of one celestial body by another.
2. **Solar Eclipse**-happens when the moon passes between the sun and earth casting a shadow on earth that either fully or partially blocks the sun's light in some areas.
3. **Lunar Eclipse** – an eclipse in which the full moon passes partially or wholly through the umbra of the earth's shadow.
4. **Umbra** – A shaded area.

## **ELA WORDS:**

1. **Mirth** - gladness as shown by or accompanied with laughter.
2. **Reverence** - honor or respect felt or shown.

## **MATH WORDS:**

1. **Energy**-The force that causes things to move.
2. **Force**-a push or pull in a particular direction.
3. **Motion**-when something moves from one place to another.
